Just Say No to Lithium Battery Facility In Rock Island County

- Battery Energy Storage Systems Have been proven Hazardous at low levels Like 10 Mega Watt.
- Tiger Energy wants to put a 200 Mega Watt Facility in our county.
- Fire risk is proven, and cannot be extinguished.
- Water run off from a fire will contaminate the ground and OUR WELLS!
- Metals in the run off will contaminate the soil.
- Smoke is highly toxic, even fatal. Firefighters do not have protection or equipment for this type of toxic gas.
- The toxic smoke can easily go 10 miles, possibly 30 miles.
- That covers from Muscatine to Cordova and Geneseo to Aledo!
- This is not a green project! All it does is buy electricity at night and sell it during the day.
- Its all about the tax credits and money.
- We assume all the risk, they get the money, we don't need this at all.
- Please Join Us.
